

Repair and maintenance

Global service network

Helping to save something precious: time.

Unexpected problems leading to machine down-times can happen at the worst possible time. At such times, what you need is a quick response. Oerlikon Barmag can respond immediately with a global network of service stations.

Qualified professionals are available at each service station to carry out repairs, to help plan maintenance, select original parts, recommend upgrades and provide advice and support.

Your advantages

- Global network of service stations close to your plant
- All repairs carried out by qualified professionals
- Original Parts to guarantee original performance
- All repairs tested to ensure 100% operational reliability
- One-year warranty on all repairs.

Winder repair and maintenance

To ensure smooth operation, it is necessary to periodically inspect the winder and to replace any wearing components. From complete winder maintenance and overhaul, to the repair of individual components, such as chucks and pressure rollers, our service stations can find the best solution for you. All repairs are handled by our professional staff with great

care. Our service includes the replacement of wearing components such as bearings, clamping elements, brakes, etc., as well as balancing. Test runs are conducted to ensure 100% operational reliability.

Godet repair and maintenance

Godets need servicing too. After years of operation, there may be damaged coatings, noisy bearings, or unnoticed variations in the temperature profile.

Send us your godets and we will assess the required service such as replacement of wearing parts like bearings, springs, O-rings as well as the cleaning and balancing of the godet shell. We can also offer recoating of godets.

Electrical service and repair

Qualified repair and service of electronics ensures that they can be used immediately in production. All repaired electronic boards and inverters are subjected to a functional test.

Back to production in no time at all

In addition to our service stations, Oerlikon Barmag offers

1. Dedicated on-site repair workshops
2. Tools and training for customer workshops
3. Service contracts for fixed repair and maintenance costs
4. Annual check-ups to optimize production

- Main Oerlikon Textile Service Network Stations plus more than 120 agencies worldwide
