Factory Refurbished Parts

Oerlikon Textile Inc. / myOerlikon.com

Dedicated to helping our customers combat obsolescence!

Why Refurbished Parts?

Many of our customers face daily challenges to keep their legacy machinery running at high production levels. With the recent obsolescence and end-of-life announcements concerning Oerlikon Barmag Spinning and Draw Texturing equipment manufactured in the early to late 90s, this challenge has become a bigger focal point for plant operations.

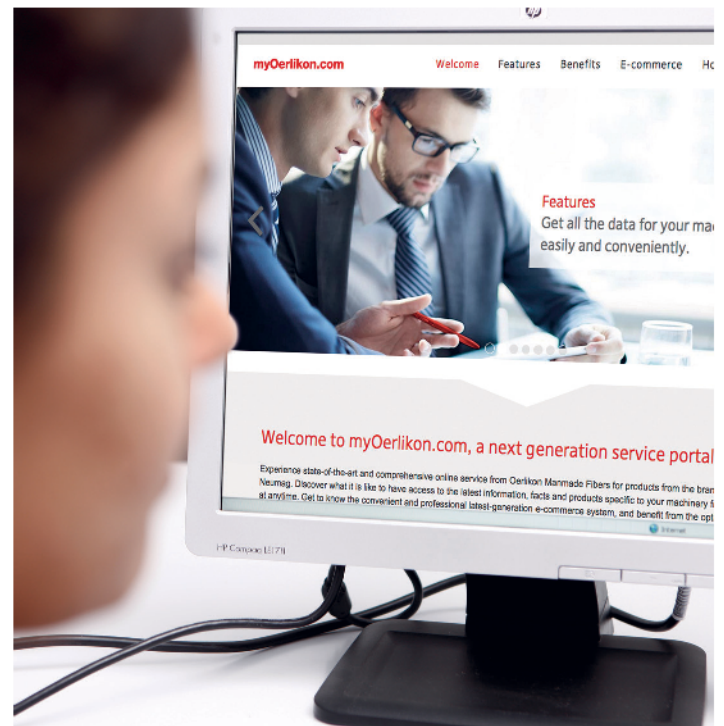

At Oerlikon Textile, we are doing everything possible to continue supporting our customers with the repair, spare parts and service for their machinery. We have invested extensively in purchasing used, non-running equipment from facilities who are no longer in business or have upgraded their legacy machinery to newer models.

These parts are systematically put through our electrical and mechanical repair departments to be completely refurbished and tested, and finally made available to our customers for purchase. To provide an understanding of this process, once we receive the used parts into our repair facility each component is completely disassembled, thoroughly cleaned, repaired, and all known preventive maintenance is completed. After this refurbishment process, a comprehensive function test is performed and the equipment is backed by a six month warranty.

Interested in a component?

To make the inquiry and purchasing process even easier, we've added an area within our eCommerce site. With the click of your mouse you can search, browse, view pricing and delivery.

Each component has a corresponding photo and detailed description to better assist you in your search. Your inquiries will be delivered directly through the myOerlikon website to one of our customer service representatives. They will then submit your inquiry or order and you will be notified through an automated e-mail.

Contact

To learn more about our Factory refurbishment program or how to navigate the myOerlikon portal, please give us a call. If you can't find what you're looking for, also let us know, it is likely we can assist in locating the refurbished parts you need!
