

For our brand new **Digital Hub in Munich** we are looking for you: a **working student** in an **IT/Computer Science education** program.

Working student (IT/Computer Science)

Oerlikon **innovations** are the foundation of **industrial** solutions to some of the **21st century's** greatest challenges: from **saving lives** to **saving the planet**. Yes, we're that ambitious.

Now imagine the caliber of performance we're pursuing with our digital transformation roadmap.

To achieve **maximum impact**, we're establishing a **Digital Hub in Munich**. And we're recruiting exceptional people to join the founding team.

Top talents in various disciplines from IoT architecture, dev-ops, data science to UX/UI design e-commerce will form a pioneering team securing our future success as an **innovation leader**.

Professionals who thrive in a **start-up** environment but appreciate **access to executives** in an established organization. **Supercharged** performers with original ideas and a clear vision of the **future**.

As a member of our team, you'll enable the Digital Hub right from its start, helping to set up the digital ecosystem, the location and the immediate infrastructure.

Your tasks include:

- **Lead, manage and support projects to build and run the Digital Hub**
- **Evaluate and establish the digital tools and systems ecosystem for the team**
- **Help with programming in Python, C++ etc.**
- **Scout for opportunities to optimize the Digital Hub's operational performance**
- **Anything you bring to the game that will excite us and make the Digital Hub a success**

You work independently and **digital is your second nature**.

English is a must and German a strong plus.

You are in the midst of your university studies.

Apply directly here or send your application right now to: career.digihub@oerlikon.com.
