

Simplify Your Purchasing...

With fully-supported, HVOF-LF spray gun consumables from Oerlikon Metco

Profit from Oerlikon Metco's more than 60 years of experience in the production of thermal spray materials and accessories with our portfolio of high-quality, compatible spare and wear components for your Oerlikon Metco WokaJet™-410 or Praxair JP5220 HVOF-LF spray gun.

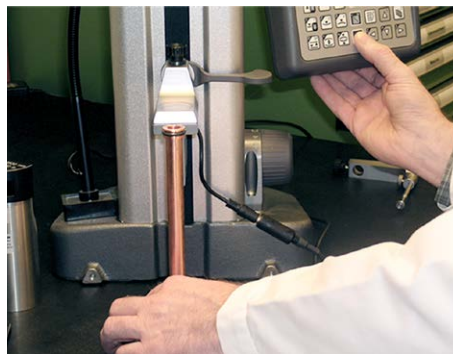

The internal components used in thermal spray guns are subject to extremely harsh environments, so we meticulously control their manufacture at every step. We carefully

choose the raw materials from select sources. Our experienced thermal spray engineers design to tolerances that provide optimum service. We manufacture using high-speed CNC machinery with advanced, in-process measurement techniques for excellent precision and reproducibility.

Conveniently simplify your purchasing with Oerlikon Metco as your source for thermal spray consumables – it's your solution for success.

Precision manufacturing

Superior quality

In stock and ready to ship
