

Coating Solution Centers... your secret to stay ahead of your competition!

Challenge us! Let Oerlikon Metco bring value to your company through the services offered by our Coating Solution Centers (CSC). Our extensive, in-depth know-how enables us to offer our customers specialized, often unique, surface enhancement solutions that bring value-added benefits to their business and improve their competitive edge.

In a normal working environment, component lifetime and performance is influenced by surface phenomena such as corrosion, scuffing, abrasion, fatigue, oxidation, etc. Surface technology provides economic solutions that improve service life, reliability and performance.

Our goal is to increase your company's profitability with surface enhancement solutions that fit your budget. The broad range of surface technologies offered by Oerlikon Metco, in combined with our extensive experience in the application of these technologies and the more than 450 standard materials in our product portfolio gives us exceptional flexibility to create a solution that is perfectly suited to your requirements. Moreover, our Coating Solution Centers can demonstrate Oerlikon Metco products, provide tailored training and provide thermal spray process support.

Today, our Coating Solution Centers can develop custom coating applications using:

- Atmospheric Plasma Spray (APS) with single or triple cathode spray guns
- High Velocity Oxy Fuel (HVOF) with liquid or gas fuel spray guns
- Combustion Wire and Powder Spray
- Electric Arc Wire Spray
- ChamPro™ Controlled Atmosphere Plasma Spray

Our Coating Solution Centers are strategically located to serve you in Switzerland, U.S.A., Japan and China
