

GM-Control

cerlikon
barmag

Metering Unit with Integrated Control Management

Operating Window: throughput: 0.0005 - 40 liter/minute
 pressure: 0 - 20 bar (higher upon request)
 viscosity: from 1 mPas

Self-Controllable: easy operation via touch screen,
 pump speed control,
 pressure monitoring,
 tank level calculation/monitoring

Interconnectable: connection to further metering systems,
 connection to production line

Mobile: wheels for flexible operation on
 different places

Precise: high precision gear metering pump,
 pressure sensor

Analog-port for production control signal
 (e.g. 0-10V)

➤➤ Control of pump speed

USB-port for tank- and fluid-data

CAN Bus ports for connection with further
 metering systems

Quick-connect couplings, drip free

➤➤ Connection of tank and outlet hose
