

For outstanding results – full reconditioning from one single-source

Take advantage of our top service for your
high-performance round tools

Reconditioning

High quality and cost-effectiveness: Reconditioning by Oerlikon Balzers

So far, tools were passed from one provider to the next when they had to be reconditioned. But now, Oerlikon Balzers offers its one-stop-shop service for round tools: It is an integrated service concept for your high-performance round tools that includes all reconditioning steps under one roof. From pickup and incoming inspection of your tools as well as regrinding and recoating to packaging and delivery,

we handle everything with single-source convenience and tailored to your needs. The result: round tools that are reconditioned and returned to you quickly – and cost-effectively at superior quality – with the coating portfolio of the world's leading provider of job coating services for as-new performance. This makes Oerlikon Balzers your preferred partner for round tool reconditioning.

The fast all-inclusive solution for your round tools

Cost-effectiveness and high quality with short turnaround times: that's what you can expect from our one stop reconditioning service from our coating centres.

50% cost savings – 100% performance

Oerlikon Balzers proves it: Reconditioning clearly reduces your machining costs in comparison with the repeated use of new tools.

Additionally, thanks to our short turnaround times, you can minimise your tool inventory and save even more.

Machined material 100%

Reconditioning is suitable for these tool types

Our service concept is available for the following tool types and sizes. But we will also provide an optimised solution for specifications not listed in this table.

	Material		Diameter		Length (mm)
			from (mm)	to (mm)	
Drills & Step drills	HSS	Carbide	6	25	350
Taps	HSS	Carbide	10	32	350
Reamers	HSS	Carbide	6	25	350
End mills	HSS	Carbide	6	32	350
