

vConnect

The next step in digitalisation for your coating equipment

→ aftersales.balzers@oerlikon.com

The “digital plug” for your coating equipment

The next step in digitalisation and automation

Get real-time data from your Balzers coating equipment for further processing!

vConnect

Our latest feature supports the widely used industry standard OPC UA (Open Platform Communications Unified Architecture) which allows the readings of real-time data from your equipment and sends it to an MES (Manufacturing Execution System) or an ERP (Enterprise Resource Planning) system.

Manage your global production with a digital dashboard

For example:

- Equipment utilisation
- coating quality
- media/energy consumption
- and many more

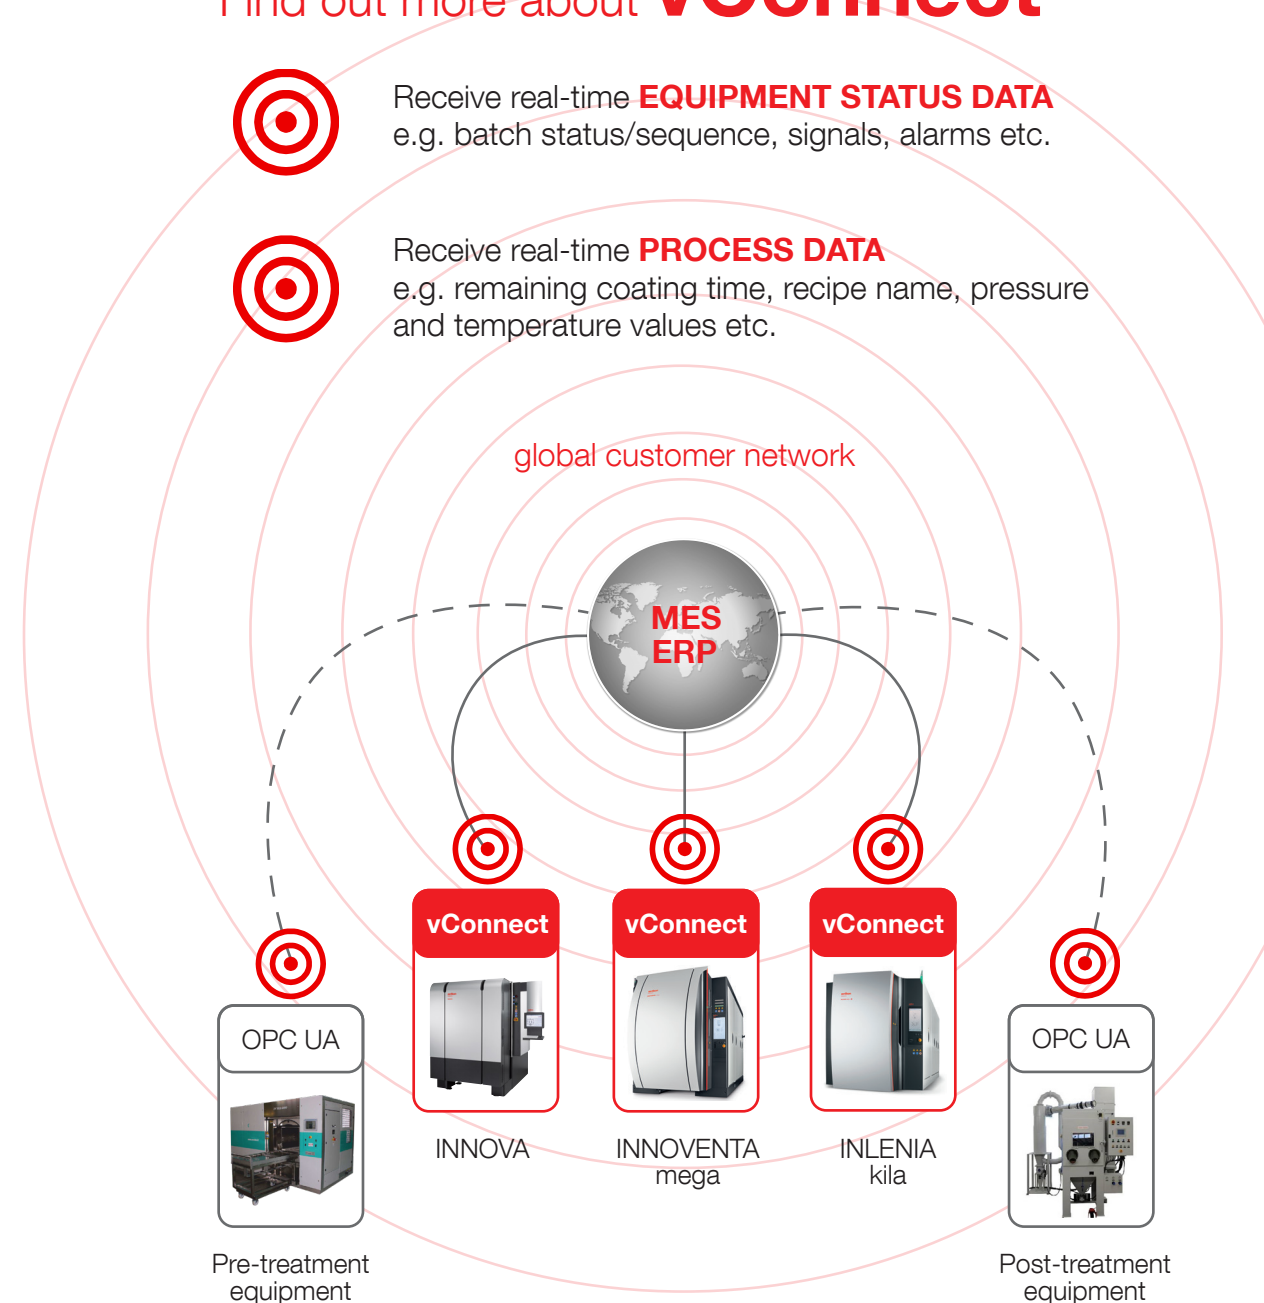

Find out more about **vConnect**

Receive real-time **EQUIPMENT STATUS DATA**
e.g. batch status/sequence, signals, alarms etc.

Receive real-time **PROCESS DATA**
e.g. remaining coating time, recipe name, pressure and temperature values etc.
