

## Woka Fine Carbides

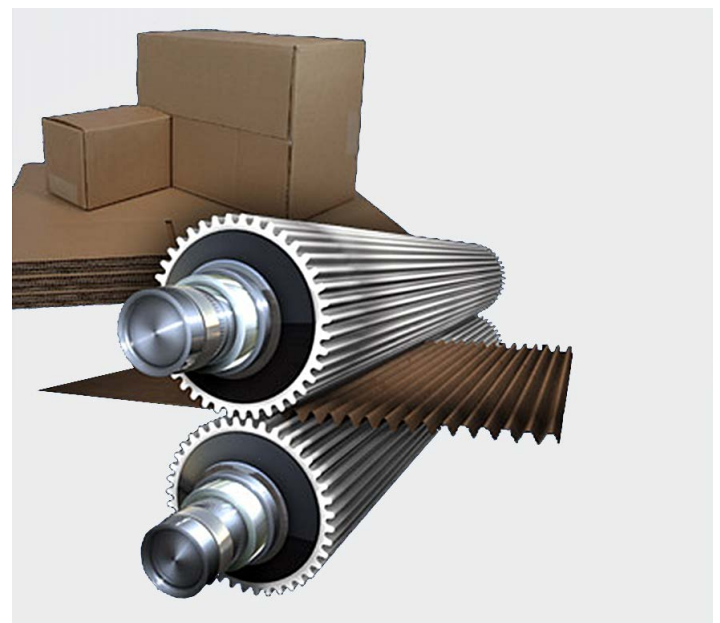

Save time ... Save costs ... And get excellent results

Our Woka fine carbides are the perfect choice when you need a high quality carbide coating material that lowers your overall processing costs. The benefits are self-evident:

- Coatings with as-sprayed surface roughness of less than Ra 3 µm (120 µin)
  - Use as-sprayed for many applications
  - Reduce or eliminate processing time for finishing
- Dense coatings for high corrosion resistance
- High hardness (> HV300 1200) for excellent abrasion resistance
- Apply coatings with Oerlikon Metco's liquid-fuel or gas-fuel HVOF guns: WokaJet™, WokaStar™ or DiamondJet™ series guns

Product	Nominal size distribution	Typical applications
WOKA 3110	-25 + 5 µm	Corrugating rolls
WOKA 3111	-20 + 5 µm	Corrugating rolls
WOKA 3660	-25 + 5 µm	Hard chrome replacement Hydraulic rods Flap actuators
WOKA 3661	-20 + 5 µm	Hard chrome replacement Hydraulic rods Flap actuators

WOKA fine carbides are ideal for corrugating rolls
